**Subject:** microsoft settlement

My feelings on the remaining states holding out on the settlement reached, is one of unbelief. Microsoft and its products have never harmed me or anyone I know in any way whatsoever. For these holdout states to not settle on this fair agreement is not in anyone's interest in this country. With the economy reeling and taxpayers dollars being wasted on further litigation is crazy. This company has done nothing but developed better products than the competition, which has benefited me and not harmed me in any way. I urge you to settle this litigation by accepting the tentative agreement reached, so this country can move along with innovating. Also this economy does not need anymore stumbling blocks. Thanks for letting me share my thoughts on this very important matter. I hope you choose to settle. Sincerely: Jeffrey D. Schmitt
